

RECRUITMENT SYSTEM REQUIREMENTS

PURPOSE

The purpose of this document is to explain the functional and technical requirements for the following modules

1. Recruitment process
2. Reporting module

The requirements will be divided into two:

- a. User/functional requirements: these describe the core functionality of the expected system. This includes the data requirements and functional process requirements
- b. Technical requirement: these describe the technical aspects of the system such as the underlying and backend architecture, system security, etc.

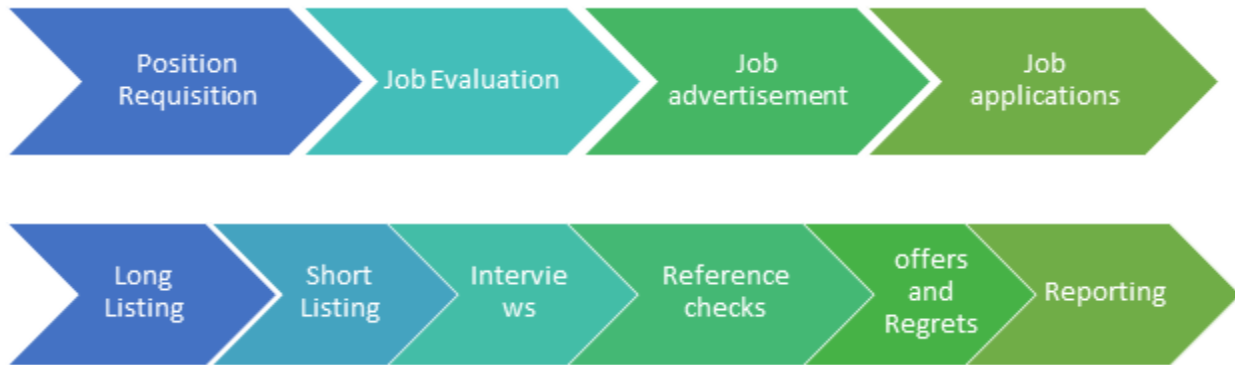

OBJECTIVES OF THE SYSTEM

The following are the objectives of the recruitment system:

- To facilitate the smooth flow of the recruitment process thus ensuring effectiveness and efficiency;
- To enable ease of application;
- To ease the process of report generation;
- To ensure data security, availability and ease of retrieval.

1. Recruitment process

The process flow diagram below indicates the major steps of the current recruitment process

Stage	#	REQUIREMENT	comment
1. Position requisition	1.	The system should support pre-loading of all the current job positions	done
	2.	The system should support the concept of positions, and vacancies linked to positions	done (grade enforcement)
	3.	The system should support single/multiple levels of approval of the employment requisition.	done
	4.	Ability to attach job description to the requisition	done (waiting for storage)
	5.	Ability to define whether its internal or external advert	done
	6.	Ability to Auto-generate job reference number	done
2. Job Evaluation	7.	The system should accept definition of the Job grade from the Job Evaluation Manager/ Job Evaluation Tool	done
	8.	The system should not allow one to proceed unless the job grade is input	done
	9.	Notify hiring manager of the job grade for their approval	done
3. Job advertisement	10.	Ability to have standard template for job adverts	done
	11.	Dis-allow for posting of incomplete adverts such as if Job title, location, type of contract, grade, etc are missing	done
	12.	The system should support single/multiple levels of approval of the advert.	done
	13.	- Support for various job status such as Pending - Cancelled - Re-advertised	done

		- Internal advert – link should not be visible to public on the site - Re-opened.	
	14.	The job advert page should be customizable for any unique positions such as consultancies (table)	
	15.	Ability to re-open closed jobs and automatically update the status to re-advertised	done
	16.	Automatic closure of job adverts after the closing date unless otherwise re-opened	done
	17.	Support for RSS feeds that can share/broadcast the job advert to other sites such as LinkedIn, twitter, etc.	done
	18.	Support for pre-screening questions	done
	19.	Allow for minor editing of posted jobs	done
	20.	Ability to set/define scores for the answers of the pre-screening questions during long listing	done
	21.	Allow for posting of confidential jobs that do not appear on the main page	done
	22.	Allow for customization of the advert link	deferred
	23.	Support for unlimited job adverts	done (depends on storage subscription)
	24.	Allow for posting of internal job adverts that do not appear on the main page	done
4. Job applications	25.	Support for unlimited number of candidates	done (depends on storage subscription)
	26.	The system should allow candidates to set their profile and upload their CV that they can use to apply for jobs.	done

	27.	The system should have a checklist for all the necessary documents i.e. Cover letter, CV and any other relevant document	done
	28.	The system should generate alert if the necessary documents have not been attached	
	29.	Candidates should NOT apply for closed jobs and a link for closed should display message "job is no longer available"	
	30.	Provide ability to determine if applicant has applied before for various positions or for same position	
	31.	The system should not allow duplicate application for same job	
	32.	Provide ability to determine if applicant has worked for the organization before	
	33.	The system should have ability to determine if applicants are internal candidates	
	34.	Allow candidates to subscribe to Autumhire jobs	
	35.	Ability to capture the age, gender, nationality , current city/country of residence among other details for the applicant	
	36.	Automatic alert to candidates when they submit their applications	
	37.	Add a clause that candidates confirm that the information they provide is correct and will be verified and candidates disqualified if it is confirmed to be false	
5. Long Listing	38.	Ability to prepare a preliminary long listing by matching applicants details with the job specifications	
	39.	Ability to define scores for the pre-screening questions	

	40.	Access to position and candidates specifications for easy referencing	
	41.	System should assist in online tracking/monitoring of applicants through each stage of the recruitment cycle.	
	42.	The system should have the query facility to search for one or more applicants and then drill down into their detailed resume information.	
	43.	The recruitment data bank should hold individual applicants' CVs containing personal details, competencies, previous work experience and academic attainments. It should be possible to identify the source of the application.	
	44.	Facility to execute bulk changes/updates to applicant's status in one single activity/screen.	
	45.	The system should support generating reports that identify the best match profiles by comparing required and existing competencies for a job/position.	
	46.	Ability to share the candidate's(s) profiles, questionnaire, CV and cover letter through email	
	47.	Ability to download the applicant's CVs, cover letters etc. with an automatic renaming as required	
6. Short Listing			
	48.	Allow for sharing of the long list with the hiring manager and panel for purposes of shortlisting	
	49.	Ability update the status after shortlisting	
	50.	Functionality for collaboration between the panel members without affecting the results when doing short listing	
	51.	Provision for rationale and comments to support the shortlisting decisions	

	52.	Allow for creation of criteria to be used for shortlisting	
	53.	Allow shortlisted candidates to be fill bio-data online	
	54.	For every page, have specified duties of the hiring manager	
7. Interviews	55.	Ability to load and share interview schedules using interview templates.	
	56.	Ability to load interview questions	
	57.	Ability to record interview scores and results with detailed comments.	
	58.	Support for generation of interview reports	
8. Reference checks	59.	Allow resourcing team to perform reference checks on the selected candidate	
	60.	Auto generated reference email picking details from the advert to the referees	
9. Offers & regrets	61.	Have a status for 'offer accepted' or 'offer rejected' when the candidate accepts or rejects the offer	
	62.	Send a notification to the hiring manager keeping them updated of the status of the process	
	63.	Allow status to be updated to 'Hired' upon acceptance of the offer by the candidate	
	64.	Send regret notification to shortlisted candidates who are not hired	
	65.	There must be a simple mechanism for moving individuals through the recruitment cycle and of the successful candidate into the new employee onboarding processes	

10. Flexibility	66.	Has provision for importation of data from Excel, documents like photos, referees and email attachments	
	67.	Calculation functions e.g. calculate number of days, etc.	
	68.	Sort function, search function etc	
11. Metrics/ Reports			
	69.	Multiple report views: Spreadsheets, Graphical reports: pie charts, time line, etc.	
	70.	Recruits per department, directorate, etc	
	71.	Graphs: Gantt chart, pie charts, bar graphs	
	72.	Age ratio	
	73.	Cost per Hire	
	74.	Time taken to fill position matrix	
	75.	Vacancy costs	
	76.	Turnover rate	
	77.	Source of job adverts	
	78.	(30-40 years) Years Hire Ratio; 40-50, 50-60.	
	79.	Nationality	
	80.	Ability to support ad-hoc reports	
	81.	Internal candidates hired ratio	
	82.	Gender Hire Ratio	
	83.	Ability to create our own reports	
12. Security	84.	No amendments/ deletions on applications by the applicant	
	85.	No access to unauthorized personnel	

	86.	Different roles and access levels for Administrators, candidates, hiring managers, etc.	
	87.	Audit trail for all user actions with time and date	
13. Backup and recovery	88.	The system should provide for built in backup and recovery protection	
14. Integration with other systems	89.	The system should support integration with other systems such as OCS, etc.	
	90.	The system should provide Web Services (WS) such as WSDL, SOAP, RDF, RSS, etc. Describe the different WS that are "out of the box."	
1. Training	1	What is the cost of training?	
	1.	Amount of time required for training	
2. Data ownership	2.	Autumhire should own the data	
3. Support & Maintenance	3.	Any maintenance and upkeep costs required?	
	4.	Is the system managed and maintained at Autumhire premises site and by ?Autumhire	
4. Archiving	5.	Ability to archive multiple jobs, candidates, etc.	
5. Location independent	6.	Ability to work from multiple locations; Addis, Nairobi, etc.	
6. Government compliance	7.	Compliance with regulations such as copyright, etc.	
7. System architecture	8.	Describe the system architecture	
	9.	What databases does it support or run on	
	10.	Is the system a modular solution?	
	11.	Which browsers and versions of those browsers does the software run on?	

	12.	What development language(s) would use to extend/enhance the system?	
8. Reliability	13.	system checks and reports must be mathematically correct, including ranking of candidates	
9. Data & templates management	14.	The solution should support various rule sets for managing differing recruitment cycles	
	15.	Ability to support various templates that can be managed by administrators	
	16.	The system should have the facility for maintenance of data on recruitment and advertising agents.	
	17.	Maintain information detailing specific employment activity phases (applicant, exam/test, interview, etc.)	
	18.	Ability to maintain new hiring data on applicant database for reporting and analysis	
10. What constitutes customer service		Such as upgrades, training, etc.	

Payment.
